

Hartford Steam Boiler Equipment Webinar Series

SWACC Equipment Breakdown coverage provider, Hartford Steam Boiler, has just announced the Equipment Webinar series. This is being offered exclusively to HSB clients as a value added service i.e. FREE. This collection of eleven scheduled forty minute online sessions, which will be offered throughout 2009 focus on the maintenance and operation of boiler, air conditioning, and electrical equipment. A complete listing of webinar descriptions and dates is attached.

These webinars are designed for equipment operators; however, no engineering or technical background is required. The sessions could also be relevant to facility directors, maintenance supervisors, and almost anyone responsible for this type of equipment.

Below is the webinar registration link:

<http://www.hsb.com/resources/webinars/engwebinars/engwebinars.aspx>

In addition to live presentations, recorded versions (as they become available) can be viewed from the same HSB webpage.

HSB's first webinar was scheduled for April 23rd, but the series is designed so that participants can jump in at any point in the series. If you have questions about the 2009 Equipment Webinar Series, contact your local Keenan loss control representative.
